

Cisco Lifecycle Services

First-Time Customer Conversation

What should I discuss during a first-time conversation with customers?

1) Actively listen for common customer challenges
2) Present Lifecycle Services as the solution to common challenges
3) Emphasize how Cisco engages with customers to help them achieve their desired business outcomes

Refer to the Lifecycle Services Customer Value Deck (CVD) for approved customer-facing content to support your first-time conversation. Also, refer to the CX Service Description homepage for details about currently available service offerings.

1

Actively Listen

Listen for the customer to describe common challenges that are consistent with the following:

- IT Complexity – The difficulty associated with keeping up with and staying knowledgeable about the volume and rapid pace of technological advancements
- Uncertainty – The difficulty associated with overcoming knowledge and skills gaps that adversely affect the successful implementation of advancing technology
- Questionable Business Value – According to a recent Gartner study, 63% of CIOs struggle to communicate the business value of IT effectively.

2

Present the Solution

Explain why Lifecycle Services is the solution to overcoming the challenges mentioned by the customer. Highlight the following:

- Outcome-Aligned – Lifecycle Services provides customers with an outcome-aligned, continuous engagement journey from implementation through swift adoption to deliver tangible business impact.
- Insight-Driven Experts – Customers receive the right expertise and digital insights enhanced by artificial intelligence, machine learning, and automation to ensure that desired business outcomes are achieved.
- Success Measures – The customer's "bridge-to-value-realization," supercharges the value of IT organizations by translating technology initiatives into clear measurable business outcomes.

3

Emphasize Engagement

Describe how Cisco helps customers achieve their desired business outcomes by highlighting the following unique aspects of Lifecycle Services:

- CX Engagement Process – Share Cisco's delivery process with customers to demonstrate how we enhance customer experience and streamline delivery.
- Purchase Options – Present the customer with currently available purchase options.
